## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 14, 2011 has been entered.

### ***Response to Amendment***

2. In response to the amendment received on July 14, 2011:
- claims 1, 14, 15 and 17-25 are presently pending
  - the rejections of claims 1, 14, 15 and 17-24 under 35 U.S.C. 112, first paragraph, are withdrawn in light of the amendments to the claims
  - the rejections of claims 1, 14, 15 and 17-24 under 35 U.S.C. 112, second paragraph, are withdrawn in light of the amendments to the claims
  - all prior art rejections are withdrawn
  - claims 1, 14, 15 and 17-25 are allowed

***Allowable Subject Matter***

3. Claims 1, 14, 15 and 17-25 are allowed.

The following is an examiner's statement of reasons for allowance:

GOTO represents the most relevant prior art. While GOTO teaches the formation of an iridium-doped carbon matrix formed by a CVD process similar to that disclosed by Applicants, GOTO does not explicitly teach the use of ruthenium (see pages 1017-1018).

Additionally, as shown by Applicant, the use of ruthenium in the carbon matrix as claimed results in a film having advantageous properties (see Remarks at page 6 lines 11-16). Furthermore, the beneficial properties that result from the use of ruthenium as the metal dopant in the carbon film are considerably greater than that realized by iridium (see Remarks at page 6 lines 4-10; 17-22).<sup>7</sup>

As a result, the Examiner is persuaded by Applicant's showing of unexpected results in light of all the facts.

Therefore, it is the Examiner's opinion that the cited prior art neither teaches nor fairly suggests a particle dispersed complex comprising an aggregate of carbon black with metallic ruthenium particles dispersed therein and surrounded by the matrix such that the particles have a diameter as claimed and that every part of the entire surface of the ruthenium particles is makes contact with either the carbon matrix or another ruthenium particle or a solid electrolyte sensor employing the thin film as an electrode surface as claimed.

Art Unit: 1723

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Response to Arguments***

4. Applicant's arguments, see pages 6 and 7, filed July 14, 2011, with respect to the rejections of claims 1, 14, 15 and 17-23 have been fully considered and are persuasive. As a result, the prior art rejections of April 15, 2011 have been withdrawn.

### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to BRYAN D. RIPA whose telephone number is (571)270-7875. The examiner can normally be reached on Monday to Friday, 9:00 AM to 5:00 PM EST.
